

To Whom It may Concern,

My name is Darlene Mueller. I could not make the open discussion meeting on Mon. June 28, 2010, but I would like to voice my opinion on the wind turbine situation in our area.

We live in the Township of Marshfield. Our lives have been changed drastically since the wind turbines have been put up.

We have many sleepless nights because of noise from the turbines. Even with windows closed & furnace or air conditioner running you can still hear them. There are nights that I am lucky if I get 1-2 hrs. of sleep. Now this is a health issue right there, because many doctors have stated that you need 6-8 hrs. of continuous sleep to keep your body healthy. Without proper sleep you can develop diabetes, high blood pressure, heart conditions, & many other organ malfunctions. Many a night my body feels like it is just shaking, but my hands aren't moving.

We need to be grandfathered in with the new restrictions.

Flicking is another problem. I sometimes have to leave my home, because my equilibrium is off. I get nauseated & sick. We should not have to live like this.

TV & radio reception are another huge problem. We were told there would be little to no problems, & if any would arise WE Energies would take care up it. I specifically stated I don't ever in all the years the turbines are up that I don't ever want to see a bill in our house for dish, or sirius radio in our house. I have been dealing with Dale Borusky since our sirius radio has been brought into our home to get this off of our bill to no avail. He wants us to sign contracts, that's bull. It is their problem they need to pay for it & fix it. They won't (WE Energies) sign any contracts, why should we. This is an easy fix. You set up accounts just like our dish is & we never see a bill for that. sirius radio should be the same. This is an easy fix, just do it instead of giving us the run around. This is not Acceptable having to fight for everything we lost. We have proof on tape how good our TV reception was before the towers were put up with just our antenna. Radio was excellent, now we have no means of knowing if major storms are coming because our radio doesn't work & tv turns off. TV & radio are easy enough fixes just do it & quit giving us the run around & headaches. Accounts can be set up in WE Energies name to pay for our Dish & Sirius radio for the lifetime of the turbines or if new technology comes to change it to improve our situations. The farmers that signed the contracts have the best of both worlds. They get paid for their misery & they have us

fighting to get Dish TV + Sirius radio for everybody.
Which of course includes them.

We can never camp out in our back yard anymore
because of the noise + flickering red lights blinking all night.

Everyone on this committee should have 40 wind turbines
within 1,000 - 1,200 feet away from their homes in order to
make right decisions for us, because until you have experienced
all of these situations you just don't know what it's like.

We want our life back. Who is going to help us.

WE NEED HELP !!

Sincerely
Darlene Mueller
